Oh! Staphylococcus,
where did you come from.

Of all the germs, bugs, viruses, why did you have to pick on me?

spherical parasitic bacteria of the genus Staphylococcus, occurring

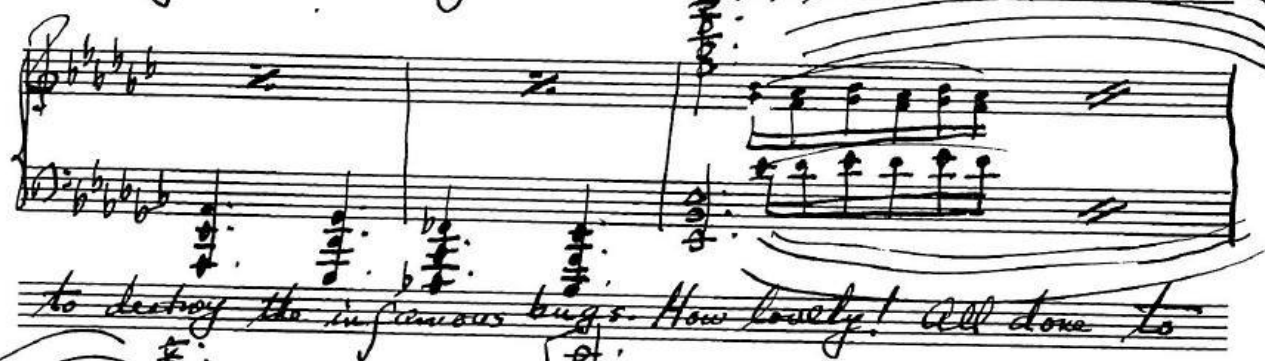

in grapelike clusters and causing boils, septicemia and other

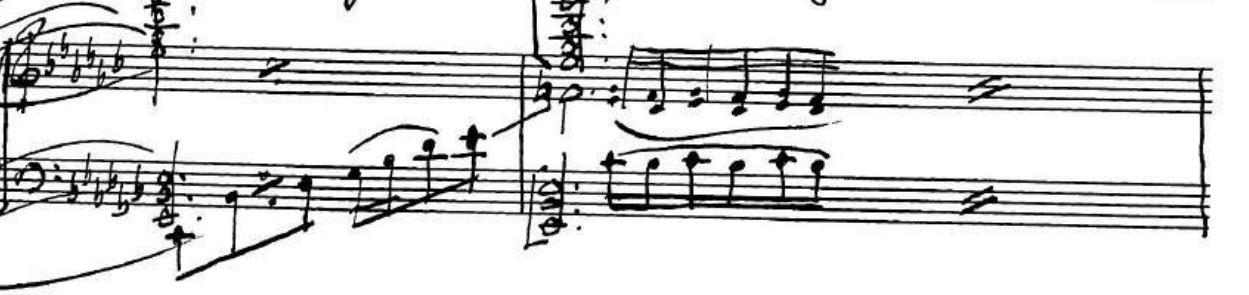

infections. Also called "staph". How cute! Now

funny! How deadly! Intra-venous injections of medications

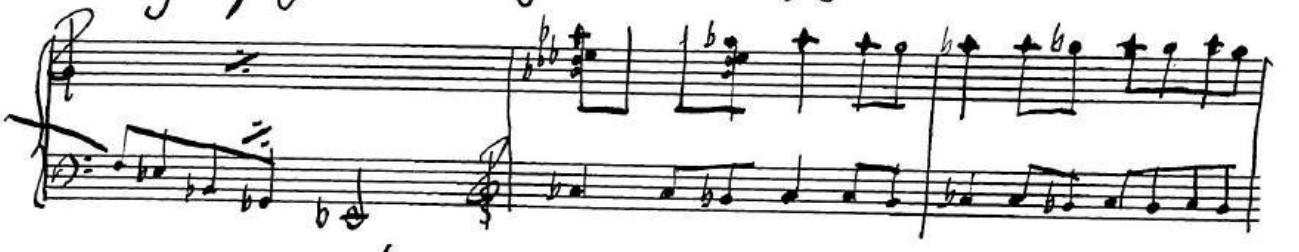

to destroy the infamous bugs. How lovely! All done to

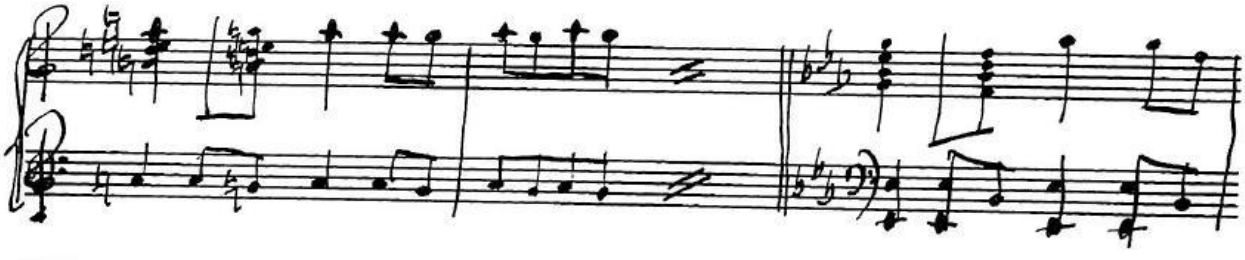

bring man back to his healthy state of life once again

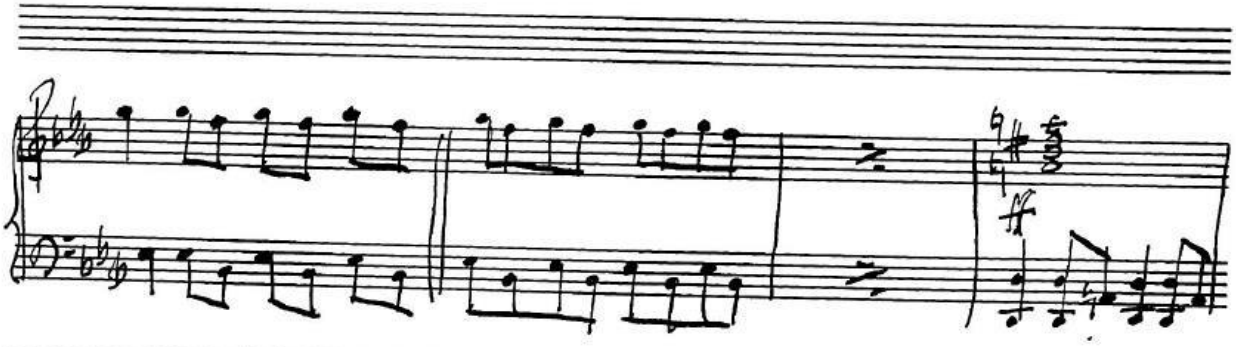

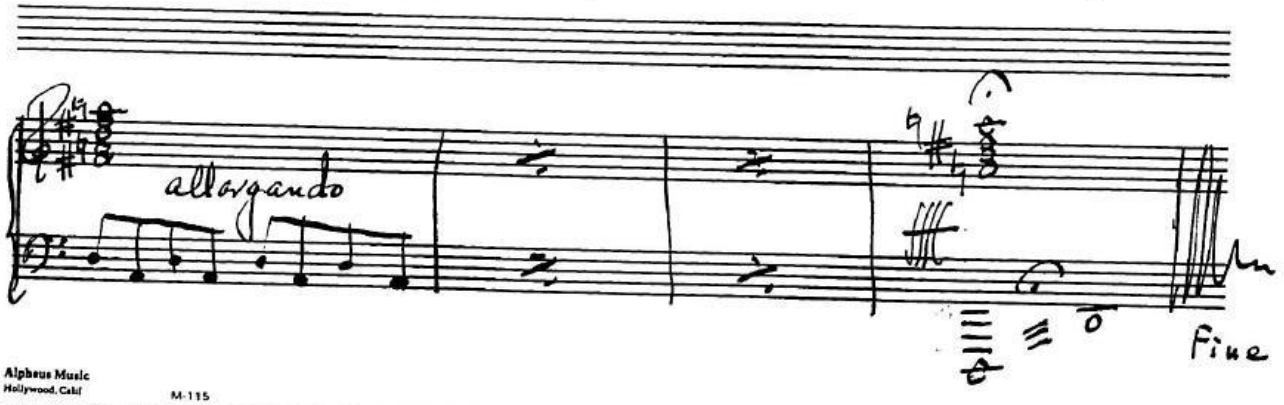

a life of full activity, creation, joy and happiness on

this earth!
